

Recitation 3

(handout used in class on September 13, 2012)

The instructor will guide the class towards developing solutions to the exercises given below. The students are strongly encouraged to attempt the exercises on their own before coming to class, and be ready to discuss/challenge the approach suggested by the instructor, as well as contribute their own ideas.

Exercise 1

Implement 'for' loops in the toy language implemented in `comp_stmt.pro`.

Exercise 2

Implement 'continue' statements, both for 'while' and 'for' loops, in the same file.
